CLEAN ENERGY JUSTICE COALITION CALLS ON LEGISLATORS TO ACT TO REFORM PACE NOW

Recent John Oliver segment on PACE emphasizes how program consistently fails homeowners

LOS ANGELES, CALIFORNIA – June 21, 2021 – We know the predatory PACE program has been failing families across California for years. John Oliver highlighted what advocates have long been saying — consumers must have the time and ability make an informed decision about what they are signing up for, have access to correct and unbiased information about the value of green-energy improvements for their homes, and ensure the work on their homes is done correctly before paying a contractor. SB 476 by Senator Min – which would introduce both pre-project audits and pre-payment inspections into California’s PACE program for the first time - is our opportunity to get it right, California legislators need to step up and right the wrongs of PACE. The bill will be up for vote on June 23 and again on June 28.
